

Education Watcher

Board of Statistics student's section in Linköping 2020/2021

Linn Friberg

Appointed during an organizational crisis in fall of 2020, Linn would with great interest- and engagement bring order to the section's education watching operations. With primary focus on her role as agent for education affairs, Linn has used her competence to assist her fellow students at the Bachelor program in Statistics- and Data Analysis, as well as the master's students of the Statistics- and Machine Learning program. Through good communication skills in English, she has through this also helped the programs foreign students.

With respect to her own professional secrecy, Linn has still with good ability been able to assist the board though her experiences, to help drive its workings within education watching forward. Linn has also been at the forefront for the sections- and the statistics students' representation towards the university institutions, participating in the quality assessment dialogue with the faculty regarding the bachelor program, as well as in the university's strategy workshop which set the course for Linköping University's vision of 2030.

Max Björklund

Chairman StatLin 2020/2021
